More Merchandising Capacity

Compared with the corresponding Impact models, the Impact Excel F Model provides 5% more merchandising space while FG provides 8% additional capacity.

Superior Freshness and Product Protection

Excellent temperature consistency and stability are maintained throughout the display zone with Hussmann's proprietary discharge air louvers and continuous tube serpentine coils.

More Energy Efficient

The impact Excel F and FG models use less energy than both Impact and competitive models. This means you get larger capacity with lower energy cost.

Lower Labor Costs

Labor saving features include greater clearance under the case, adjustable feet, easier raceway access and simplified wiring.

Superior Reliability

Our five year coil warranty is the best available. Pre-set expansion valves are designed to hold optimal temperatures throughout the life of the case.

Note: These merchandisers are designed for use in stores when temperature and humidity do not exceed 75°F and 55% RH.

Note: We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions or replacements for equipment previously sold or shipped.
