

Impact Excel Now Has the Flexibility of Two Exterior Designs: Streamline and Contour

Bridgeton, MO – (December 5, 2006) – Hussmann, a business unit of diversified industrial company Ingersoll Rand, is now offering its popular Impact Excel refrigerated display case line with two exterior design options. This makes Excel more flexible than ever, with options of either streamline or contour exterior styling on all medium temperature, multi-deck models. Both designs are built on the same Excel platform, so customers get all Excel performance and energy saving benefits, regardless of style.

Original Excel Streamline Styling

The “original” Excel streamline style features straight lines in both canopy and front panel, creating a clean, modern look. The interchangeable canopy surface allows the use of lighted canopy signs, a unique Excel merchandising feature available only with streamline styling. Excel streamline styling is also available on all low temperature models.

New Excel Contour Styling

The new Impact Excel contour styling features a curved canopy and multi-faceted front panel to create a contoured look in both areas. Available on all medium temperature, multi-deck models, Excel Contour provides a smooth, rounded style with a softer, more organic feel.

Mixed Style With Streamline Canopy and Contour Front Panel

To further the design flexibility of Excel, customers can mix and match streamline and contour style options to customize cases and achieve the designs they prefer. For example, streamline canopies with lighted canopy signs can be matched with contour front panels. Any combination of streamline and contour front panels and canopies can be selected.

To extend Excel's energy efficiency benefits, the popular Excel integrated night curtain option is available for both streamline and contour styling. Night curtains provide a 12.6% overall energy saving when used 6 hours per day. This is in addition to the 18% energy reduction Excel with E-Plus coil achieves over standard Impact models.

Husmann, a global manufacturer of refrigeration and food merchandising equipment, operates as part of the Ingersoll Rand Climate Control Technologies Sector. Providing equipment and services to manage controlled-temperature environments for food and other perishables, Ingersoll Rand Climate Control Technologies encompasses both transport and stationary refrigeration solutions. In addition to Husmann, its product brands include Thermo King®, a world leader in transport temperature control systems.

Ingersoll Rand is a global provider of products, services and integrated solutions to industries as diverse as transportation, manufacturing, food retailing, construction, and agriculture. With a 135-year-old heritage of technological innovation, Ingersoll Rand helps companies be more productive, efficient and innovative.
