### **HUSSMANN LAUNCHES NEW Q3 MULTI-DECK DELI CASES**

Bridgeton, MO – Husmann Corporation, a leading manufacturer of refrigerated and frozen food merchandising equipment, has launched a new line of multi-deck service deli cases as part of the successful Q Series. These new Q3 merchandisers offer retailers a number of benefits.

The Q3's 24" display height is taller than the Q1 cases, allowing for increased merchandising flexibility, greater product capacity and will hold a full complement of aftermarket accessories, such as steps, risers and pedestals. Additionally, the case can be configured with optional 10' and 12" lighted glass or stainless steel mezzanine shelves.

The stylish curved glass of the Q3 enhances product visibility and provides merchandising flair. Granite or solid surface designs allow for amazing merchandising displays.

Designed for ease of installation, the Q3 has a simplified glass adjustment with a special alignment design that assures a precise quality fit and finish.

The ergonomic design of the Q3 makes it simple to access products. A large rear door opening and steep angle make reaching inside easy.

The following models are now available for deli: Q3-DC curved glass; Q3-DS straight glass; and Q3-SS self-service. Coming soon will be the Q-HC and Q-HS hot cases. Later in 2008, we will roll out the Q3-SS curved wedges, Q Series conical wedges and the Q3 meat and bakery cases.

Husmann is a part of Ingersoll Rand's Climate Control Technologies sector, which provides equipment and services to manage controlled-temperature environments for food and other temperature sensitive products. The sector encompasses both transport and stationary refrigeration solutions. In addition to Husmann, Ingersoll Rand product brands include Thermo King, a world leader in transport temperature control systems and Trane, a leading manufacturer of air conditioning and heating systems.
