Hussman unveils new multi-deck deli cases

InStoreBuyer.com, June 17, 2008
by John Unrein

Hussmann Corp. has launched a new line of multi-deck service deli cases as part of their Q Series. These new Q3 merchandisers offer retailers a number of benefits.

The Q3's 24-inch display height is taller than the Q1 cases, allowing for increased merchandising flexibility, greater product capacity and will hold a full complement of after-market accessories, such as steps, risers and pedestals.

The stylish curved glass of the Q3 enhances product visibility and provides merchandising flair. Granite or solid surface designs allow for innovative merchandising displays.

Designed for ease of installation, the Q3 has a simplified glass adjustment with a special alignment design that assures a precise quality fit and finish.

The ergonomic design of the Q3 makes it simple to access products. A large rear door opening and steep angle make reaching inside easy.

The following models are now available for deli: Q3-DC curved glass, Q3-DS straight glass, and Q3-SS self-service. Coming soon will be the Q-HC and Q-HS hot cases. Later in 2008, the company will introduce the Q3-SS curved wedges, Q Series conical wedges and the Q3 meat and bakery cases.
