## EXCEL CONTOUR AND STREAMLINE STYLED CASES

# One Platform, Two Great Designs.

---

Hussmann Excel is now more flexible than ever, with options of either streamline or contour exterior styling on all medium temperature, multi-deck models. Both designs are built on the same great Excel platform. This means you get all the Excel performance and energy saving benefits, regardless of the style you choose.

### The “Original” Excel Streamline style.

Clean, straight lines in both canopy and front panels define the look of the Excel Streamline design. The interchangeable canopy surface allows the use of lighted canopy signs, a unique Excel merchandising feature available only with streamline styling.

### “New” Excel Contour.

Excel Contour features a curved canopy and multi-faceted front panel to create a contoured look in both areas. Available on all medium temperature, multi-deck models, Excel Contour provides a smooth, rounded style with a softer, more organic feel.

Excel Contour:

### New contoured ends now used on all styles.

Our new contoured end design is now being used for all multi-deck models, whether Streamline or Contour. Full view glass ends and rectangular solid ends are also available.

### Integrated night curtains available on all multi-deck models.

Our popular Excel integrated night curtains are available for both Streamline and Contour styling. Night curtains provide a 12.6% energy savings when used 6 hours per day.

### Mix and match: Your choice.

With Excel flexibility, you can mix and match style options to customize the case for the design you want. For example, you may want Streamline canopies, lighted canopy signs, and Contour front panels. It's your choice. Select any combination of Streamline and Contour front panels and canopies.
