

Don't Put Microbes on Display

With Microban® protection, odor, and stain-causing bacteria are reduced over time.

Unprotected Case Surfaces

Husmann Cases with Microban Protected Surfaces*

INTRODUCING HUSSMANN ONLY

Microban® Antimicrobial Protection!

Industry's first multi-deck and reach-in cases
with Microban antimicrobial protection:

- Helps protect shelving that displays meats, seafood, produce and packaged products.
- Protects door handles on reach-in cases and walk-in cooler doors.
- Provides 24/7 protection for the lifetime of the shelves and door handles.
- Infused in products during the manufacturing process - protection won't wash off or wear away.

Microban protects shelves from bacterial odors and stains.

Microban protects produce shelving from stains, odors and mold that can be caused from moist environments.

Microban protects shoppers' touch points like reach-in handles to stay cleaner between cleanings.

Microban technology inhibits the growth of bacteria, mold, and fungus that causes stains, odors, and product deterioration. Even after normal cleaning, microbes can quickly multiply on an unprotected surface, as bacteria can double in number every 20 minutes.

* This information is based upon standard tests and is provided for comparative purposes to substantiate antimicrobial activity for non-public health applications. Microban technology is not designed to protect users from disease causing microorganisms.

How Microban antimicrobial protection works.

Microban antimicrobial technology is infused into products during the manufacturing process and becomes a permanent part of the molecular structure. When microbes, such as stain and odor causing bacteria, mold and mildew, come in contact with the product surface, Microban protection penetrates the cell wall of the microbe and disrupts key cell functions so the microbe cannot grow or reproduce.

Targeted surfaces.

Reach-In Door Handles

Multi-Deck Shelves

Wire Racks

shelving and wire racks protected by

Shoppers can buy with confidence knowing that Microban antimicrobial protection keeps display surfaces and handles cleaner.

Show your customers you're concerned about providing a cleaner, fresher shopping environment by displaying Microban labels on your cases.
