# EcoShine ULTRA Canopy LED

THE NEXT GENERATION OF LED'S

**Hussmann has been leading the Food Retail Industry in application specific LED lighting designs for refrigerated merchandisers since 2011.**

We have recently teamed up with our Panasonic partner, Universal Lighting Technologies, to bring you this next generation in our EcoShine Platform, the EcoShine ULTRA, accentuating food packaging through highly accurate color rendering and light placement to attract, guide, and influence shopper behavior for increased purchases.

## Improved Lighting Merchandising Performance

Product visibility has never been better!

New LED optics not only enable high CRI (93+) and R9 (>70) values for optimal color rendering but lumens per watt is increased by 20+% (105+) for increased light output at same low energy.

## Save Money

Replace two or three rows of fluorescent lights with one row of ES ULTRA canopy.

No high output model required. All ES ULTRA LEDs are DLC listed enabling Utility Rebates (contact Hussmann for more info).

## Enhanced Form Factor and Flexibility

Fixture size reduced for increased adjustability and enables additional row of lights if desired (not required).

## Same Outstanding Performance

New look but same outstanding performance.

EcoShine ULTRA LED's pass IP67 standards to keep out moisture and ice buildup.

Compatible with existing installations.

Scan the QR code for more details about our new EcoShine ULTRA Vertical LEDs.
