

Freedom Line Multi-Deck Cases

DF5NX, CF5X

Giving you the flexibility of field installed refrigeration on top of the case or from a remote location

Freedom Line Multi-Deck Cases

Refrigeration options include field installed top condensing unit or piping to a remote system.

Full size multi-deck display case allows more product facings than typical self-contained cases.

Narrow footprint DF5NX reduces required floorspace and maximizes aisle space. Larger footprint CF5X also available.

The Freedom Line provides all the merchandising power of a remote supermarket multi-deck, plus the flexibility of various refrigeration options and the mobility of a drainless case.

The DF5NX narrow footprint platform is ideal for small footprint food stores and other applications where flexibility and no floor drains are important.

A matching facade conceals top mounted components.

Available Sizes:

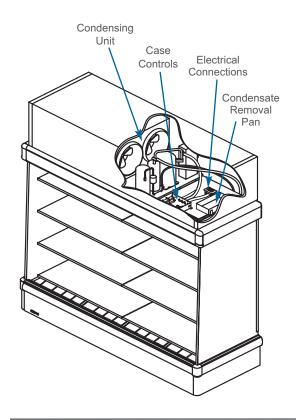

- Freedom Line is available in the CF5X convertible case and the DF5NX narrow footprint dairy case.
- Can be connected to create line-ups.
 - Plexiglass partitions used between like temperature cases.
 - The CF5X convertible case can be used for multiple medium temperature applications.

Freedom Line Flexibility: Refrigeration Options

Easy Installation:

- No drains required: condensate removal system with field installed pump and condensate pan.
- Refrigeration lines are pre-charged and pre-piped to top of case with quickconnect, threaded couplings for easy condensing unit installation.
- Pre-wired and labeled to simplify electrical connections.
- Matching facade conceals top-mounted refrigeration and electrical components.

Option A: Top Field Mounted Condensing Unit

Option B: Remotely Piped to Rack or Protocol System

Option C: Piped to Remote Condensing Unit

Freedom Line

- Great Merchandising
- Maximum Energy Efficiency
- Refrigeration Options
- Easy, Flexible Installation

Large Display with Narrow Footprint

- Full-size reach-in solution to increase product facings and improve sales
- More display capacity than typical self-contained models
- Narrow footprint DF5NX keeps required floor space to a minimum

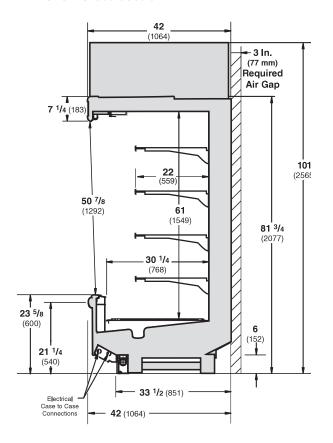

Extremely Energy Efficient

- Highly efficient design helps keep energy costs lower than other options

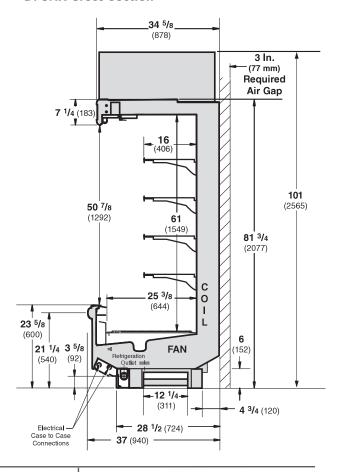

Factory installed electronic controls

- Temperature and defrost controls
- Sound and visual temperature alarm
- Time clock
- Network communications
