

EcoVision High Ambient Doors

FOR INSIGHT MULTI-DECK CASES

- Operate well in higher ambient conditions
- Two high ambient glass door options available

Advanced merchandising with lower energy cost.

ECOVISION HIGH AMBIENT DOORS

Designed with Your Store Conditions in Mind

Use of anti-corrosive components on EcoVision High Ambient Doors enhances durability and appearance.

Designed for higher ambient conditions.

EcoVision High Ambient Doors are designed for use in stores where ambient conditions exceed the normal range of 75°F and 55%RH. They work well in hot, humid climates where it is difficult to maintain proper temperature and humidity levels in the store.

Two Optional High Ambient Doors

The EcoVision High Ambient Doors are available in two options, depending on the severity of store conditions.

ECOVISION HA

Heat-Free EcoVision High Ambient Doors - operational in elevated ambient conditions

ECOVISION HA+

Heated EcoVision High Ambient Doors - operational in extreme ambient conditions

EcoVision Glass Doors, which operate in the normal range of up to 75°F and 55%RH, are standard on all Insight multi-decks with doors.

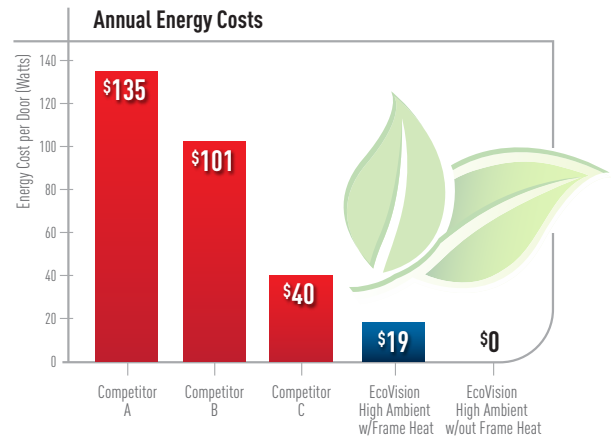

Excellent visibility and shopper access.

- French glass doors with no center mullion provide outstanding view of products from every angle.
- Ultra-thin door frame in the center opening enhances product visibility.
- Gray and black color options available (color selection comes with matching trim, handles, frames and mullions).
- Narrow 24" French glass doors help preserve aisle space and improve peak traffic flow.

Outstanding energy reduction opportunity.

- EcoVision Heat-Free High Ambient Doors require no electrical energy for the doors or frames.
- The EcoVision High Ambient Doors with heated frames require much less heat than comparable competitive doors and operate in extreme ambient conditions.

Enhanced reliability and door performance.

- Glass door design has been tested to show excellent reliability after 10 years.
- Glass door hold-open design is not only highly reliable, but allows the door to open, stay open, and close with little effort.
- Anti-corrosive components enhance durability and appearance.
- Glass door hold-open allows for full access to four feet of shelving for easy stocking and cleaning.
- Adjustment casting is easy to mount and align. Glass doors swing and close easily with minimal adjustment.
- High-reliability wipers effectively minimize air penetration when glass doors are closed.
