

## microSC™

### What is microSC?

Hussmann's new microSC product portfolio consists of self-contained merchandisers that utilize R-290 (propane), a natural, non-toxic refrigerant that is environmentally safe.

### Benefits of microSC

#### Low environmental impact

- Environmentally-friendly R-290 refrigerant has zero ozone depletion potential (ODP) and 3 Global Warming Potential (GWP)

#### Regulatory Environment: Future-Proof

- Propane meets new energy and environmental regulations
- The EPA lists R-290 as an acceptable refrigerant substitute under its Significant New Alternatives Policy

#### Low installation costs and timing

- Faster installation with “plug and play” cases - factory charged, tested and programmed
- Because of their design simplicity, microSC units are easily maintained and serviced
- Most models only require 120V electrical

#### Flexible merchandising

- Self-contained and quick connection cases are easily moved to accommodate planogram changes
