Note:
Maximum outside
dimension of case
(side-to-side)
includes bumper.

Note

Use Husmann's technical data sheets to get precise dimensions for all store layout purposes.

Excellent Refrigeration Performance

Designed for bulk produce applications, the PWR provides dramatic advances in refrigeration performance for produce island displays. A unique coil, center flue and air discharge design forces cold air through products. Produce is kept colder with very stable and consistent temperatures throughout the entire display area. Each end case also has a dedicated coil and fan package to ensure superior refrigeration performance.

Less Refrigerant Needed

Husmann modular coils require 50% to 60% less refrigerant within the coil than full length coils.

Quick, Easy Cleaning

High impact bottoms with radius corners are easier to clean. Lift-out back panels provide quick access to fan assembly.

Solid Durability

Heavy-duty corner assemblies are designed to stand up to the punishment of daily abuse. True shock absorbing dual bumper system further protects case exterior. Heavy-duty base and skids.

Husmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

NOTE: These merchandisers are designed for use in stores when temperature and humidity do not exceed 75°F and 55% R.H.

NOTE: We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions, or replacements for equipment previously sold or shipped.
