**Note: Changes are NOT underlined.**  
**Revision A** added the canopy anti-sweat heater (pages 1, 4, 5 & 8); added 4-ft and 6-ft data (pages 1, 2, 3 & 4); and updated wiring diagrams.  
**Revision B** returned the correct data to page 3.  
**Revision C** returned the correct data to page 1.

**SHELF CONFIGURATION**

This merchandiser is designed for one, two or three shelves.

The depth of the shelf used in the top eight (8) shelf hole locations is critical to case performance.

If a shelf is placed in one of the top eight (8) locations it must comply with the angle/depth requirements listed below.

Shelf Angle	Maximum Shelf Depth
0°	12 in.
15°	14 in. or less
30°	18 in. or less
45°	18 in. or less

**NOTE:** Shelves placed in the lower positions may be up to 18 in. deep when positioned at a 0° angle.

**CANOPY AND SHELF LAMP BALLAST**

The ballast for the canopy and shelf lamps is located behind the canopy on the left-hand end (when facing case) of the merchandiser.

To access the ballast:

1. Remove screws at bottom edge of canopy and rear of top panel.
2. Remove the canopy by pulling it forward.
3. Remove the top panel by lifting it up.
4. Service or replace ballasts as required.
5. Reassemble items as they were originally installed.

**NOTE:** Rail lamp ballast is located behind the lower front panel.

**CANOPY ANTI-SWEAT HEATER**

The canopy anti-sweat heater location is shown below. Connections are in the Electrical wireway.
