| Btu/hr/ft — Unlit Shelves <sup>‡</sup> | Parallel | Conventional | Parallel  | Conventional  |
| Unlit                                  | 1325     | 1475         | 1205      | 1295          |

<sup>‡</sup> Add 10 Btu/hr/ft *per shelf row* for LED fixtures.

§ Average evaporator temperature shown. Use dew point for high glide refrigerants for unit sizing. Care should be taken to use the dew point in PT tables for measuring and adjusting superheat. Adjust evaporator pressure as needed to maintain discharge air temperature shown.

ME5X-GP

**CI/CO\*** 15°F/5°F

Indoor Unit Only,

**Pressure Defrost Termination\*** 48°F

\*Use a Temperature Pressure Chart to determine PSIG conversions.

| Estimate | ed Charge** | M     | E5X-P  |
|----------|-------------|-------|--------|
| 4ft      | 1.9 lb      | 30 oz | 0.9 kg |
| 6 ft     | 2.5 lb      | 40 oz | 1.1 kg |
| 8 ft     | 3.7 lb      | 59 oz | 1.7 kg |
| 12 ft    | 5.1 lb      | 82 oz | 2.3 kg |

<sup>\*\*</sup>This is an average for all refrigerant types. Actual refrigerant charge may vary by approximately half a pound.

### **NSF** Certification

This merchandiser model is manufactured to meet NSF/ANSI (National Sanitation Foundation) Standard #7 requirements for construction, materials & cleanability.

<sup>†</sup> For energy consumption comparison only.

<sup>120</sup>V Lighting Circuit Total = Standard Lighting + Total Optional Lighting + Optional Shelf Lighting

Please note: some combinations of fluorescent lights on this case model may not be compliant with DOE 2017 and may not be available to order in the US and Canada. More lighting options are available with LED lights. The Hussmann Product Configurator will not allow lighting options that do not comply with the DOE 2017 standards.

<sup>120</sup>V LED Lighting Circuit Total = Canopy Lighting + Shelf Lighting

<sup>230</sup>V Lighting Circuit Total = Multiply 120V Lighting Circuit Total by 0.52

### **SHELF CONFIGURATION**

This merchandiser is designed for three, four, or five shelves.

Hussmann recommends the top shelf be not more than 16-inches deep.

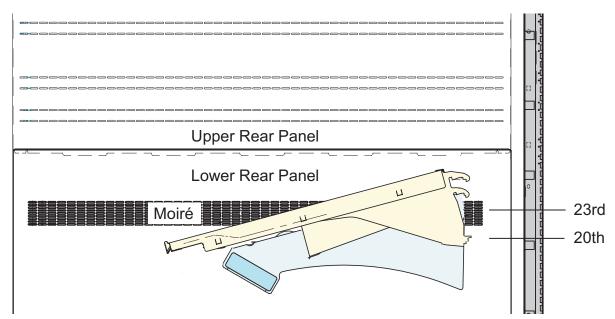

The Duct Shelf is easier to install if the duct assembly is inserted AFTER the Duct Shelf is installed.

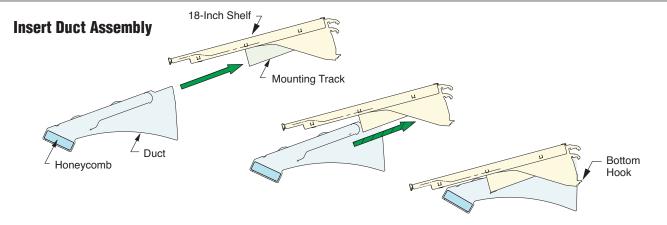

The duct shelf must be installed at a 10– or 15–degree tilt with the bottom hook of each bracket inserted above slot 20 and below slot 23 (counting from the bottom of the interior back panel).

When properly installed, the duct will cover the large moiré pattern in the lower back panel. The duct is designed so that the shelf can move up or down within three positions and still cover the moiré pattern.

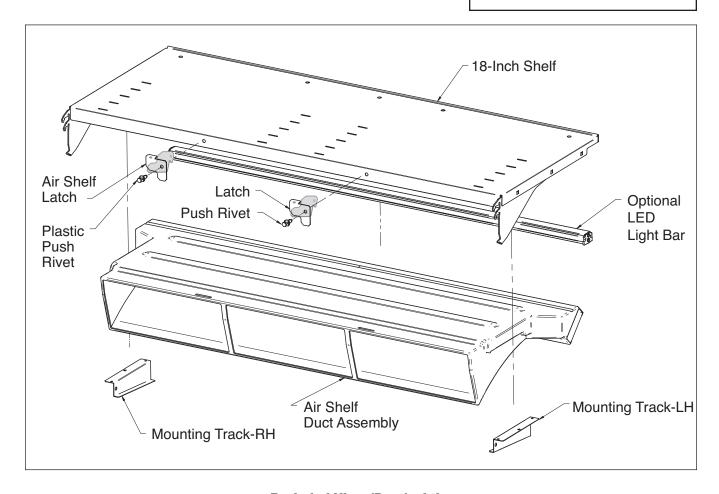

After sliding duct in completely, tabs at rear of shelf must be rotated downward to hold the duct in position.

An exploded view of the Duct Shelf Assembly is shown on the next page.
