	Parallel Btu/hr/ft (Watts/m)	990 (290)	940 (275)	935(274)
	Conventional Btu/hr/ft (Watts/m)	1080 (317)	940 (275)	1020 (299)
Fan Speed ⁴	IP4SLI456 (8.25")	1400 ⁴	1400 ⁴	1400 ⁴

Notes:

1. All data based on store temperature and humidity that does not exceed NSF Type 1 ambient conditions of 75°F and 55% relative humidity except where noted.

2. Average evaporator temperature shown. Use dew point for high glide refrigerants for unit sizing. Care should be taken to use the dew point in PT tables for measuring and adjusting superheat. Adjust evaporator pressure as needed to maintain discharge air temperature shown.

3. AHRI 1200 Rating Point for energy consumption comparison only.

4. Some lengths and/or applications require optional fan speed control kits applied by the Hussmann Product Configurator.

Insight Multideck Merchandiser, 4 Display Levels, Standard Bottom, Low Height Front, Wedge

DOE 2017 Energy Efficiency Compliant

Hussmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

Shelf complement shown as tested:

Three rows of 16, 18 and 18-in. shelves spaced equally between bottom display pan and interior top panel.

Other optional kits (top piping and vent fans) add to the overall case height.

3-in. between back to back cases.

Shown with Ellipse Option Canopy and Bumper.

Shelf Options

Approved shelf sizes for standard (horizontal, 2-3 position brackets) displays:

14-inch 16-inch 18-inch 20-inch 22-inch

Contact engineering for non-standard (4 position brackets or other) display recommendations.

Minimum number of Shelves: 3

Optimal number of Shelves: 4

Maximum number of Shelves: 6

Maximum number of Lighted Shelves: 5

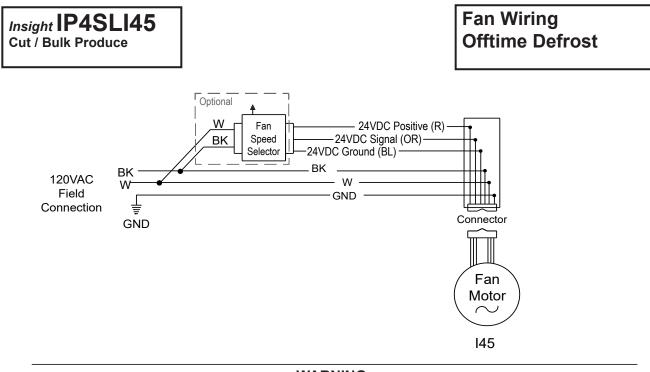

Standard shelf complement for test purposes: (3) 16, 18 & 18-in. shelves, evenly distributed vertically

• = 120V Power	r o = 120	V NEUTRAL	∔ = Field G	ROUND	mm = Case Ground

Estimating Refrigeration and Electrical Load (for comparison purposes only)

Case Btu

To determine Btu for a case, refer to the performance data chart on page 2. Select lit or unlit shelves, then select the type of remote refrigeration system (parallel or conventional), which will give Btu/hr. Add 10 BTU/HR for each row of LED shelf lights.

Case Electrical

Refer to store legend to determine number of circuits. Lighting should be specified in store legend.

Fan electrical load for a case is computed by selecting the fan voltage on page 5. For example, the store legend specifies fans on a 230V circuit. In this instance, fans use 0.17 Amps and the MCA is 0.37. When applied, ambient fans, anti-sweat heaters, controllers, etc. must be included in the MCA. Include lights in the MCA if lights are on same circuit.

Lights may be on a separate circuit. To estimate lighting load: select shelf lighting [maximum for which case is wired] (0.17 for five shelves); then add together [0.17 amps for 120V] (for 230V, multiply 0.17 * 0.52 = 0.09).

Line Sizing — Refer to store legend.

Hussmann Line Sizing Charts are engineered for use with Hussmann refrigeration equipment.
