### Reach-in 2, 3, 4 and 5 Door Models

Hussmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

Standard Reach-in configuration consists of Innovator I doors, energy efficient fan motors, and EcoShine II LED vertical lighting.

#### Dimensions shown as in. & (mm).

Estimate	ed Charge	rge *** RL	
1Dr	0.9 lb	14 oz	0.4 kg
2Dr	1.8 lb	29 oz	0.8 kg
3Dr	2.7 lb	43 oz	1.2 kg
4Dr	3.6 lb	58 oz	1.6 kg
5Dr	4.6 lb	74 oz	2.1 kg

\*\*\*This is an average for all refrigerant types. Actual refrigerant charge may vary by approximately half a pound (8 oz / 0.2 kg).

#### **NSF** Certification

This merchandiser model is manufactured to meet NSF/ANSI (National Sanitation Foundation) Standard #7 requirements for construction, materials & cleanability.

## RI

With Innovator Doors or Innovator III Doors

Low Temperature

#### **REFRIGERATION DATA§**

**Note:** This data is based on store temperature and humidity of 75°F and 55% R.H. (except where noted).

**OFFTIME** Not Recommended

#### **CONVENTIONAL CONTROLS**

**Low Pressure Backup Control** 

FF IC CI/CO (Temp °F)\*\* -18°/-34° -26°/-45°

Indoor Unit Only, Pressure Defrost Termination (Temp °F)\*\*\*

Not Recommended

\*\*\*Use a Temperature Pressure Chart to determine PSIG conversions.

Anti-sweat controls are standard for all low temperature Reach-in cases with Innovator I doors.

## **RL**

With Innovator Doors or Innovator III Doors Low Temperature

Hussmann recommends against frame heater cycling with *Innovator* doors or *Innovator III* doors to prevent door seals from freezing to the frames and tearing.

# Fan and Heater Circuits - Electric Defrost (standard) Low Temperature

R = Red P = Purple 2P = Purple (2 Bands) DB = Dark Blue BK = Black
LB = Light Blue BR = Brown Y = Yellow OR = Orange W = White

THESE ARE MARKER COLORS (WIRE MAY VARY.)

#### **Electric Defrost Sequence - Low Temperature**

- 1. Power from the defrost contactor energizes Defrost Heaters and 208V Evaporator Fan Relay Coil (7). Relay Contacts open the fan circuit and energizes the Drain Pan Heater.
- 2. If the Defrost Heater raises internal air temperature above 90°F, the Defrost Limit Thermostat (4) will open.

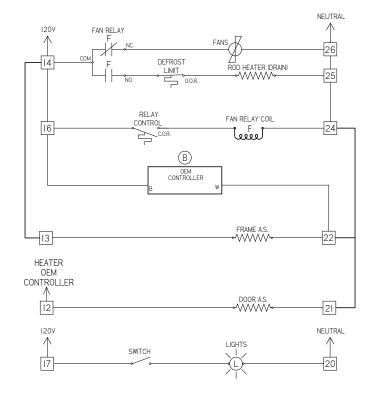

THE HEAVY LINES DRAWN OUTSIDE THE TERMINAL BLOCKS REPRESENT REMOVABLE EXTERNAL JUMPERS.

- 3. When Defrost Termination Thermostat ends defrost period, the defrost contactor opens the Defrost Heater and Evaporator Fan Relay Coil Circuits. The Drain Pan Heater goes off and fans are on.
- 4. Standard low temperature Reach In cases with Innovator I doors are shipped with the OEM controller for door anti-sweat heater control installed. Do not connect the OEM controller input to a centralized anti-sweat system. It must be connected to a continuous 120V circuit for proper operation.
- 5. If the case is connected to a centralized anti-sweat controller that meets DOE compliance requirements, the OEM controller is not installed on the case. Feed the 120V controller output into terminal #12.
- 6. Options may be installed that have additional or replacement wiring diagrams.
- 7. Reach In cases with Innovator III doors do not have the OEM controller.

# Fan and Heater Circuits - Gas Defrost (optional) Low Temperature

 $\begin{array}{lll} R=Red & P=Purple & 2P=Purple & (2 \; Bands) & DB=Dark \; Blue & BK=Black \\ LB=Light \; Blue & BR=Brown & Y=Yellow & OR=Orange & W=White \\ \end{array}$ 

THESE ARE MARKER COLORS (WIRE MAY VARY.)

Refer to Innovator Reach-In Glass Door, Installation and Service manual, P/N 0425683, for Innovator door and frame replacement parts.

3028736 B

#### **Gas Defrost Sequence - Low Temperature**

- 1. Defrost vapor enters evaporator causing a rise in temperature. At about 35°F the Control Relay Thermostat (5) closes the Fan Relay Coil (7) and Control Relay Coil (6) circuit. The Coil opens the Fan, Door Heater, and Frame Heater circuits, while energizing the Drain Pan Heater (9).
- 2. If the Drain Pan Heater (9) raises internal air temperature above 90°F, the Heater Limit Thermostat (4) will open.
- 3. When the defrost timer ends a defrost period, the evaporator temperature will start to fall. At about 20°F, the Control Relay Thermostat will open, de-energizing the Control Relay Coil and Fan Relay Coil (7). Control and Fan Relay's will open the Drain Pan Heater circuits, and will close the Fan, Door Heater, and Frame Heater circuits.
- 4. Standard low temperature Reach In cases with Innovator I doors are shipped with the OEM controller for door anti-sweat heater control installed. Do not connect the OEM controller input to a centralized anti-sweat system. It must be connected to a continuous 120V circuit for proper operation.
- 5. If the case is connected to a centralized anti-sweat controller that meets DOE compliance requirements, the OEM controller is not installed on the case. Feed the 120V controller output into terminal #12.
- 6. Options may be installed that have additional or replacement wiring diagrams.
- 7. Reach In cases with Innovator III doors do not have the OEM controller.
