Fan Speed ⁸	IDF5SM6 (8.25")	1300	1500	1500	1300	1300
	IDF5SM4, 8, 12 (8.25")	1300	1500 ⁸	1500 ⁸	1300	1300

Notes:

1. All data based on store temperature and humidity that does not exceed NSF Type 1 ambient conditions of 75°F and 55% relative humidity except where noted.
2. Average evaporator temperature shown. Use dew point for high glide refrigerants for unit sizing. Care should be taken to use the dew point in PT tables for measuring and adjusting superheat. Adjust evaporator pressure as needed to maintain discharge air temperature shown.
3. Data for operation in NSF Type 2 ambient of 80°F and 55% relative humidity.
4. Hussmann Peg Shelves for Dairy/Deli applications only.
5. AHRI 1200 Rating Point for energy consumption comparison only.
6. Subtract 60 Btu/hr/ft (57.7 Watts/m) for front glass (on applicable models).
7. Add 10 Btu/hr/ft (9.6 Watts/m) per shelf row for LED shelf light fixtures.
8. Some lengths and/or applications require optional fan speed control kits applied by the Hussmann Product Configurator.
9. Reduce refrigeration load by 15% if fitted with CaseShieldPTM.

DOE 2017
Energy Efficiency
Compliant

Husmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

Shelf complement shown as tested:

Four rows of 22-in. shelves spaced equally between bottom display pan and interior top panel.

Other optional kits (top piping and vent fans) add to the overall case height.

A minimum 1 1/2 in. clearance required to remove raceway cover 6 1/2 in. for full access. See the Installation manual for instructions.

3 in. between back to back cases.

Shown with Ellipse Option and Bumper.

OPTIONAL RAIL LIGHT

Rail light cannot be used with glass front option.

OPTIONAL GLASS FRONT

Glass front cannot be used with rail light option.

Estimating Refrigeration and Electrical Load (for comparison purposes only)

Case Btu

To determine Btu for a case, refer to the performance data chart on page 2. Select lit or unlit shelves, then select the type of remote refrigeration system (parallel or conventional), which will give Btu/hr/ft. Multiply this number by the length of the case to determine Btu per hour. Add 10 BTU/HR/FT for each row of LED shelf lights.

Case Electrical

Refer to store legend to determine number of circuits. Lighting should be specified in store legend.

Fan electrical load for a case is computed by selecting the case length and fan voltage on page 6. For example, a 12 ft case uses 3 fans. The store legend specifies fans on a 230V circuit. In this instance, fans use 0.39 Amps and the MCA is 1.84. When applied, ambient fans, anti-sweat heaters, controllers, etc. must be included in the MCA. Include lights in the MCA if lights are on same circuit.

Lights may be on a separate circuit. To estimate lighting load: select case length (12 ft), canopy lighting [standard or optional] (here 0.70 for standard), and shelf or rail lighting [maximum for which case is wired] (1.48 for six shelves); then add together $[0.48 + 1.48 = 1.96 \text{ amps for } 120\text{V}]$ (for 230V, multiply $1.96 * 0.52 = 1.02$).

Line Sizing — Refer to store legend.

Hussmann Line Sizing Charts are engineered for use with Hussmann refrigeration equipment.
