Notes:

1. All data based on store temperature and humidity that does not exceed NSF Type 1 ambient conditions of 75°F and 55% relative humidity except where noted.

2. Average evaporator temperature shown. Use dew point for high glide refrigerants for unit sizing. Care should be taken to use the dew point in PT tables for measuring and adjusting superheat. Adjust evaporator pressure as needed to maintain discharge air temperature shown. 3. Data for operation in NSF Type 2 ambient of 80°F and 55% relative humidity.

Conventional Controls

4. Hussmann Peg Shelves for Dairy/Deli applications only.

5. AHRI 1200 Rating Point for energy consumption comparison only.

6. Add 10 Btu/hr/ft (9.6 Watts/m) per shelf row for LED shelf light fixtures.

7. Some lengths and/or applications require optional fan speed control kits applied by the Hussmann Product Configurator.

8. Reduce refrigeration load by 15% if fitted with CaseShieldPTM.

Insight Freedom Multideck Merchandiser, 6 Display Levels, Standard Bottom, Ultra Low Front

Hussmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards.

Dimensions shown as in. and (mm).

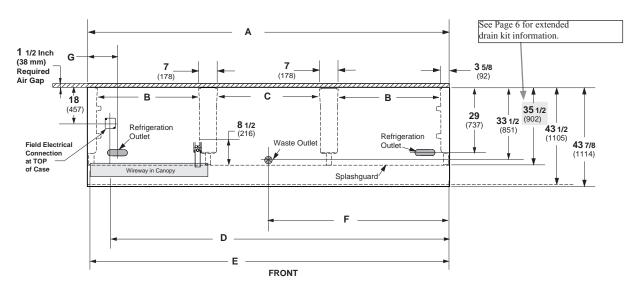

If extended drain kits are used, the distance from back of case (not including air gap) – increases to 41 inches. This may affect floor drain layout. See Page 5 for more details.

Waste Outlet Drain Extension Option

Dimensions shown as in. and (mm).

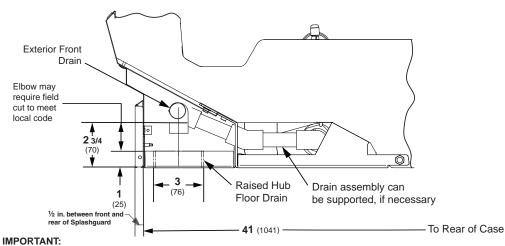

FRONT

(12 Foot Model shown above)

		4 ft	6 ft	8 ft	12 ft
Waste Outlet Drain Option					
(A)	RH of case to center of interior case drain	24 1/8 (613)	24 1/8 (613)	24 1/8 (613)	72 1/4 (1835)
(B)	RH of case to center of exterior front drain and floor drain* *Drain extension shown piped to the right but may be either direction	13 ³ / ₄ (349)	13 ³ / ₄ (349)	13 ³ / ₄ (349)	61 ⁷ / ₈ (1572)
(C)	Back of case to center of original waste outlet	33 1/2 (851)	33 ¹ / ₂ (851)	33 ¹ / ₂ (851)	33 ¹ / ₂ (851)
(D)	Back of case to center of relocated waste outlet (with drain extension kit)	38 1/4 (972)	38 ¹ / ₄ (972)	38 1/4 (972)	38 ¹ / ₄ (972)
(E)	Back of case to the back of the relocated splashguard (with drain extension kit)	41 (1041)	41 (1041)	41 (1041)	41 (1041)

DRAIN EXTENSION KIT REQUIRED TO PIPE MULTIPLE CASES TO ONE DRAIN OR TO USE A RAISED HUB DRAIN

IMPORTANT: If the hub drain is used instead of a flush floor sink, a drain extension kit must be installed. Hub drains must be located in front of the waste outlet because of the reguired air gap.

ESTIMATED SHIPPING WEIGHT †

Case					Solid End
	4 ft	6 ft	8 ft	12 ft	(each)
lb (<i>kg</i>)	900 (408)	1100 (499)	1300 (590)	1700 (771)	100 (45)
+ Actual weights will	vary according to optional	kits included.			

Shelf Options

Approved shelf sizes for standard (horizontal, 2-3 position brackets) displays:

18-inch 20-inch 22-inch 24-inch

Contact engineering for non-standard (4 position brackets or other) display recommendations.

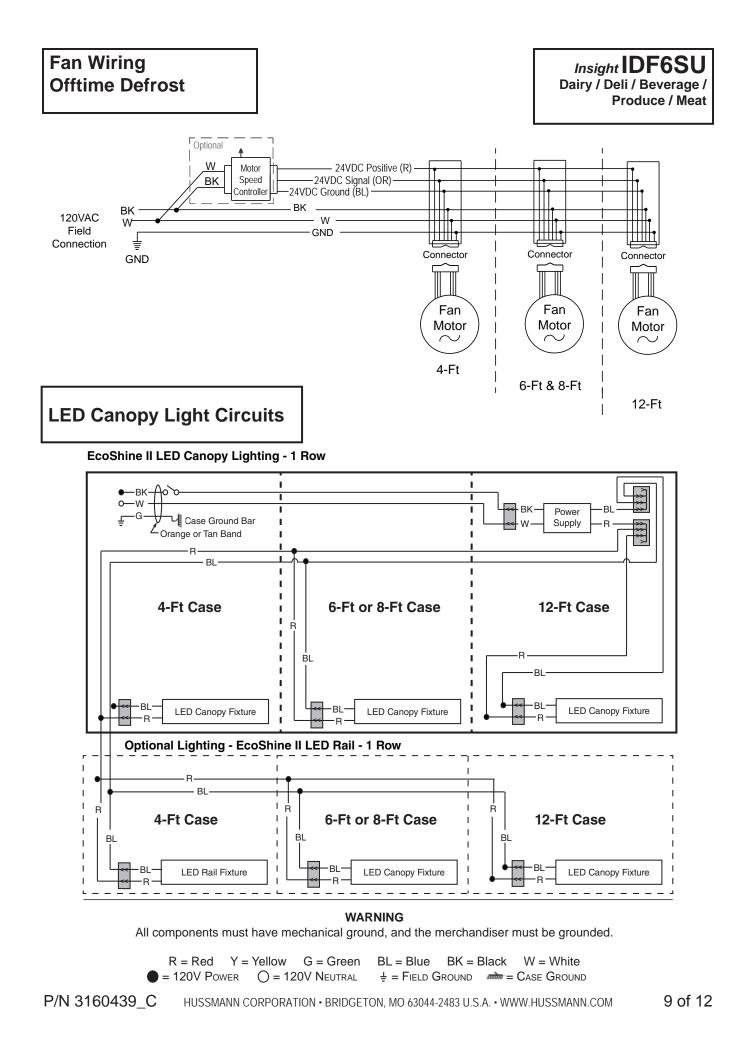

Minimum number of Shelves: 4

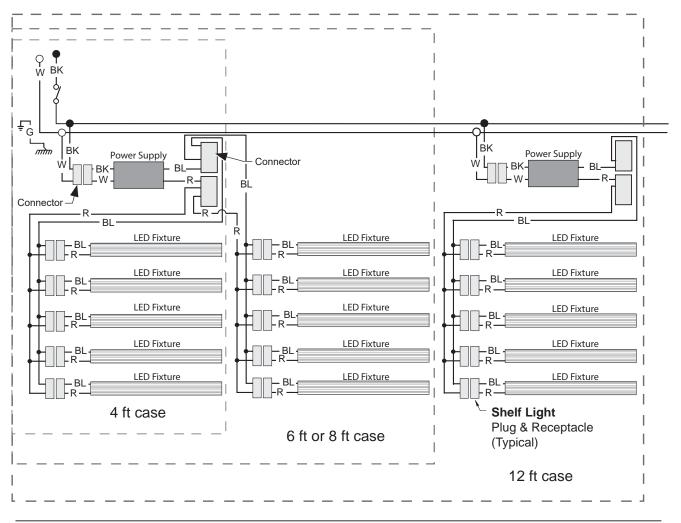

Optimal number of Shelves: 5

Maximum number of Shelves: 8

Maximum number of Lighted Shelves: 7

Standard shelf complement for test purposes: (5) rows of 22-in. shelves evenly distributed vertically.

Shelf Harness and LED Light Circuits for 4 or 5 Rows of Shelves

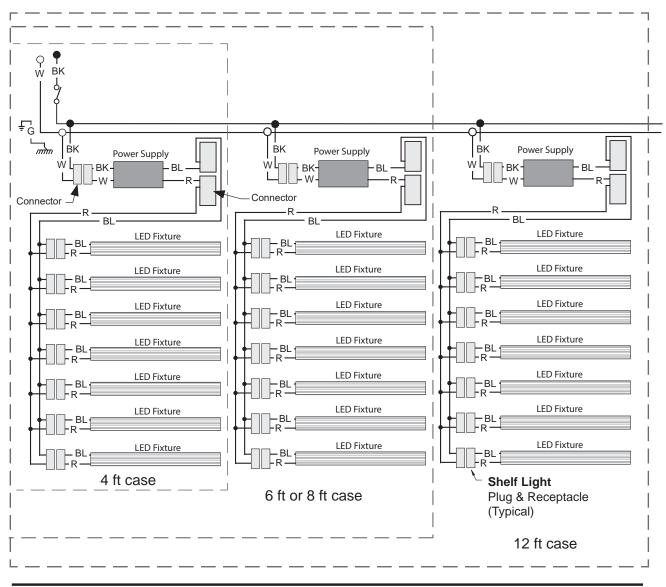

WARNING

All components must have mechanical ground, and the merchandiser must be grounded.

R = Red	Y = Yellow	G = Green	BL = Blue	BK = Black	W = White
• = 120V Power	x ○ = 120'	V NEUTRAL	⊥ = Field G	ROUND mm	= CASE GROUND

Optional Shelf Lighting—LED Fixtures

Shelf Harness and LED Light Circuits for 6 or 7 Rows of Shelves

WARNING

All components must have mechanical ground, and the merchandiser must be grounded.

 Insight **IDF6SU** Dairy / Deli / Beverage / Produce / Meat

Estimating Refrigeration and Electrical Load (for comparison purposes only)

Case Btu

To determine Btu for a case, refer to the performance data chart on page 2. Select lit or unlit shelves, then select the type of remote refrigeration system (parallel or conventional), which will give Btu/hr/ft. Multiply this number by the length of the case to determine Btu per hour.

Case Electrical

Refer to store legend to determine number of circuits. Lighting should be specified in store legend.

Fan electrical load for a case is computed by selecting the case length and fan voltage on page 6. For example, a 12 ft case uses 3 fans. The store legend specifies fans on a 230V circuit. In this instance, fans use 0.62 Amps and the MCA is 0.82. When applied, ambient fans, anti-sweat heaters, controllers, etc. must be included in the MCA. Include lights in the MCA if lights are on same circuit.

Lights may be on a separate circuit. To estimate lighting load: select case length (12 ft), canopy lighting [standard or optional] (here 0.70 for standard), and shelf or rail lighting [maximum for which case is wired] (1.73 for seven shelves); then add together [0.48 + 1.73 = 2.21 amps for 120V] (for 230V, multiply 2.21 * 0.52 = 1.15).

Line Sizing — Refer to store legend.

Hussmann Line Sizing Charts are engineered for use with Hussmann refrigeration equipment.

Revision History

Revision A: January 2022: Original Issue

Revision B: February 2022: Updated refrigerant charges.

Revision C: July 2022. Added notes for Extended Drain Kit Option.
